

As well as providing all the daily activities you would expect from a top-quality childcare provider, our nurseries provide a range of activities from external companies included within the fees.

Our activities are delivered through a combination of our staff and by bringing in experienced and qualified professionals from external agencies who can ensure that children benefit, learn and develop from these fantastic activities.

These activities are simply part of our quality brand and should be enjoyed by all children – therefore they are provided at no extra cost.

Treasure Basket Play provides a great sensory experience designed to offer children a wide variety of natural materials and objects to explore.

Ballet Our ballet teacher provides weekly dance lessons in Ballet, Tap and Modern dance for children aged 2+. She is an Associate of the Royal Academy of Dance, The Imperial Society of Teachers of Dancing and the National Association of Teachers Dancing.

Music and Dancing provides a fun and interactive physical workout for children incorporating music, toys, dance and exercise. We alternate between a variety of companies to ensure that children are always learning something new.

Sports Centre we have exclusive use of the play den at the sports centre in Basingstoke town centre and the children in Skyline Plaza & Crown Heights are able to enjoy the facilities every week.

Cooking - Establishing healthy eating habits in young children is very important and as well as providing a balanced and nutritional menu we introduce the children to cooking at an early age. They learn to cook with a variety of different textures and cooking utensils to ensure they develop a natural interest in what they are eating and build practical skills for learning in many other areas..

French - Young children have the ability to absorb a language easily and love to communicate with the world around them. Learning a second language early in life, not only improves children's communication skills but also enriches their overall development.

Activities may vary at the different nursery locations.
